Securexam Remote Proctor, 2011 CODiE Award - Best Mobile Education Solution

Recognized for protecting academic integrity while promoting student convenience

Newton MA, May 25, 2011 - [Software Secure, Inc.](#), a pioneer in secure, computer-based testing solutions, today announced that its [Securexam Remote Proctor System](#) has been selected by the Software & Information Industry Association (SIIA) as a winner in the 26th Annual CODiE Award competition for “Best Mobile Education Solution.”

“We are honored to have Software Secure recognized by our peers and other industry leaders in this prestigious competition,” said Douglas M. Winneg, Founder and CEO of Software Secure. Software Secure was founded to facilitate the responsible use of technology in teaching and testing: enabling computer-based testing by designing software solutions that prevent digital cheating. “Our Remote Proctor offering is the first product to extend real test integrity to the distance learning environment truly supporting the mobile learner.”

The Software & Information Industry Association (SIIA), the principal trade association for the software and digital content industries, announced the winners of the 2011 CODiE Awards in the education technology industry on May 23, during a special awards reception in conjunction with the organization’s Education Technology Industry Summit.

Over 425 nominated products and services were first reviewed by journalists and industry peers, who chose 113 finalists. SIIA members then reviewed these finalists and voted to select the thirty winners, recognized for products and services developed specifically for the K-20 market.

Software Secure’s Securexam Remote Proctor uses finger-scan biometrics to authenticate the identity of a distance learning test-taker, and then records audio and a 360 degree view of the exam-room, wherever that is, allowing remote test takers to take secure tests, anytime, anywhere.

About Software Secure

Software Secure is a pioneer and market leader in secure, computer-based testing solutions featuring Securexam Remote Proctor, part of the company's Securexam Suite

offering. Academic institutions throughout the world as well as organizations overseeing high-stakes testing environments such as the bar and chartered accountant exams have chosen Software Secure for testing solutions that exceed regional and national accreditation standards as well as federal regulation requirements, and facilitate the responsible use of technology in education.
