

Secureexam Student

Computerized Testing Made Simple and Secure

Secureexam Student is the easy and safe way to bring the exam process into the computer age. This unique software helps make exams less stressful for everyone: school administrators know that exams are being administered efficiently without the possibility of students using computers to cheat; students use familiar word processing functions to best demonstrate their knowledge during the exam, faculty grade legible exam answers that can be formatted for their printer or delivered electronically.

Ease of Use for Student:

- Contains same editing features and short-cut keys as found in Microsoft Word®
- Exam responses are separated into different tabs, making it easier to go between responses
- Separate window shows response details, including page, word count and elapsed time
- Format of response window (including statistics, rulers, toolbars) is customizable
- Response file is automatically saved every 60 seconds

Feature Rich for School:

- Exam and Security settings can be set on an exam-by-exam basis, including: Closed-Book or Open Book, spell-check, time limits, word restrictions, etc.
- Ability to attach reference materials (articles, statutes, etc.) to the test, further eliminating handouts, and ensuring equal access during the test
- Exam responses are automatically uploaded to school account on Software Secure's Exam Management System – PlanetSSI
- Built in trouble-shooting capability can send exam logs to SSI for review
- Supports full customization of print-jobs, including uniform use of fonts, font-size, use of formatting, and even sending separate answers to different printers

System Requirements

For PC: Windows XP, Vista, 7 (32-64 BIT)

For Mac: Macintosh OS 10.6 and higher
